

Carlos Alberto Mariscal Romo

Computer Engineering

3312767594 | www.linkedin.com/in/mcarlos7 | Guadalajara, México

PROFESSIONAL PROFILE

Computer Engineering student passionate about software development. Solid knowledge in full-stack development (React, Node.js), Data Science (Pandas, Scikit-learn), and Python programming. Also interested in video game development with Unity. Seeking an internship, trainee or Junior Developer position to apply my problem-solving skills and contribute to challenging projects.

EDUCATION

University Center for Exact Sciences and Engineering (CUCEI) Computer Engineering

Expected completion: December 2026

Relevant Coursework: Machine Learning, Video Game Development, Software Engineering, Databases

PROJECTS

Anfitrion – Venue Management

System Developed a comprehensive full-stack SaaS application to streamline the management of event venues (Terrazas). The system digitizes operations including event scheduling via an interactive calendar, inventory tracking (rentals and consumables), and financial management (income/expenses). Implemented role-based access control and automated database management.

Technologies: Next.js 16 (App Router), TypeScript, Prisma ORM, Supabase (PostgreSQL), Tailwind CSS.

Website: <https://anfitrion-one.vercel.app>

C++ Mini-Compiler

Lexical and syntactic analyzer built in Python with a user-friendly graphical interface developed as a project for the "Compilers" course. This tool is designed to help understand the fundamentals of compilers, including lexical and syntactic analysis of the C++ language.

Technologies: Python (for analysis) and Tkinter (for the GUI).

GitHub: https://github.com/MCarlos7/MIN_COMPILER_PY-CPP

ARM-VR

Led a team in the development of this final project for the "Software Engineering" course. Developed a simulator in Unity (C#) focused on training and evaluating user performance (precision and speed) in manipulation tasks. Handled 3D asset modeling using Blender.

Technologies: Unity, C#, Blender

GitHub: <https://github.com/MCarlos7/ARM-VR>

EnergIA

Responsive front-end web application (HTML/CSS/JS) to educate on energy efficiency. The project was developed as part of a collaboration between UdeG CUCEI and IBM consultants.

GitHub: <https://github.com/roglivoc/EnergIA>

SKILLS & LANGUAGES

Languages: Spanish (Native) / Ingles (Nivel B1) Proulex 2022

Software:

Programming Languages: Python, JavaScript (ES6+), TypeScript, HTML5, CSS3, C, C++, C#, Java

Frameworks / Libraries: React.js, Node.js, Bootstrap, Next.js 15/16, Tailwind CSS

Data Science / Machine Learning: Pandas, Scikit-learn

Game Development: Unity, Blender

Databases: MySQL, PostgreSQL, Oracle Database, Prisma ORM, Supabase

Design & Control Tools: Git, GitHub, Figma, Android Studio

Soft Skills: Critical thinking, data-driven decision-making, open to feedback, adaptability, Ambiguity management

COURSES & CERTIFICATIONS

Learn, Connect, Transform: Databases with Oracle

Expected completion: April 2026

Oracle Volunteering program to master database technologies
